## Experience

**RoboCurve | Y Combinator S26** **July 2026 – Present**
*Open Source Contributor – AI / LLM Agents* *Remote*
- Resolved **3 Isaac Sim plugin failure paths** (PR #41): run-success handling, import guards, and float-frame edge cases.
- Hardened **4 LLMAgentPolicy inputs** (PR #170) with guided **ConfigError validation** for model, base URL, API key environment, and speed.

**InsForge | Y Combinator P26** **May 2026 – Present**
*Open Source Contributor – Backend and RBAC* *Remote*
- Replaced the single environment-based admin login with a **DB-backed multi-admin model** (PR #1495), adding bcrypt hashing, soft-delete, and timing-safe verification.
- Fixed **PostgreSQL RBAC** through a **3-commit migration** (PR #1563), granting `project_admin` SELECT on `system.database_backups` and setting default privileges for future system tables; added migration tests.

**Valoron Consulting** **May 2026 – September 2026**
*AI-Native Full Stack Developer* *Remote*
- Owned end-to-end development of **Fanito**, an AI social platform built with Next.js, Supabase, and PostgreSQL, designed to support **10K+ users**.
- Architected **Kafka–PostgreSQL event-driven workflows**, decoupling services for asynchronous processing across distributed components.
- Led **Grafana observability and k6 load testing** across **500 concurrent VUs** and **55.8K HTTP requests**, recording **0% failures** and **22.5ms p95 latency**.

**Twenty | Y Combinator S23** **June 2026 – July 2026**
*Open Source Contributor – MCP / AI Agent Systems* *Remote*
- Fixed a **high-severity MCP attribution bug** (PR #22215) by setting **FieldActorSource.AGENT** on MCP-created records, preventing loop-protection misclassification.
- Integrated **WorkspaceCacheModule** into the MCP module and added automated tests for correct agent-source attribution.

## Projects

**OpenMemory** | *FastAPI, Neon, ChromaDB, bge-small Embeddings, MCP* **August 2026 – Present**
- Implemented a persistent-memory service with **FastAPI, Neon, and ChromaDB**, using **bge-small embeddings** and **MCP** to expose stored memories to AI agents.

**HealthCareAI** | *React, Node.js, FastAPI, MongoDB, Redis, WebRTC, NLP, GPT-4* **January 2026 – February 2026**
- Developed an **Intelligence Layer** for **3 user roles** with isolated **JWT authentication**, reducing data lookup time by **60%**.
- Engineered a **Neural Dietary Engine** using **NLP, GPT-4, and OpenAI API** with local fallback for **95% offline reliability**.
- Integrated **WebRTC video** into HealthCareAI's **3-role platform**, adding encrypted patient-doctor communication and role-isolated access controls.

**Canteeno** | *Node.js, Express.js, MongoDB, Redis, Socket.io, AWS EC2* **October 2025 – November 2025**
- Engineered **real-time orders** with **Socket.io and Redis Pub/Sub**, handling **100+ concurrent connections** under **500ms latency**.
- Tuned **MongoDB indexes**, reducing p95 query latency by **41%** from **320ms to 190ms**; deployed on **AWS EC2**.
- Shipped the production MVP solo in **2 weeks**, sustaining **99.9% uptime** for **3 months** and reaching **50+ users** with **$0 marketing**.

## Technical Skills

**Languages**: JavaScript (ES6+), TypeScript, Python, C++, SQL
**Frontend**: React, Next.js, HTML, CSS, Tailwind CSS
**Backend**: Node.js, Express.js, FastAPI, REST API Design, JSON, WebSockets, Socket.io, JWT, OAuth 2.0, RBAC, Microservices
**AI / ML**: Machine Learning, NLP, LLMs, GPT-4, OpenAI API, Embeddings, ChromaDB, AI Agents, MCP
**Data & Architecture**: PostgreSQL, MongoDB, Redis, Prisma, Database Indexing, Event-Driven Architecture, Kafka
**Cloud & DevOps**: AWS (EC2), Docker, GitHub Actions, Nginx, Vercel, Grafana, k6, Monitoring and Observability
**Testing & Tools**: Unit Testing, Integration Testing, Git, GitHub, Postman, Jest, Linux

## Education

**Ajay Kumar Garg Engineering College** **October 2023 – May 2027 (Expected)**
*Bachelor of Technology in Computer Science and Engineering* *Ghaziabad, Uttar Pradesh*
- CGPA: **8.64/10.0** | **Merit Scholar**
- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management, Computer Networks

## Achievements

- **Smart India Hackathon (SIH) 2025 Grand Finalist** – selected among the top teams nationwide for building a scalable solution under 36-hour constraints.
